

CodeSet 706 - PHILIPS RC6

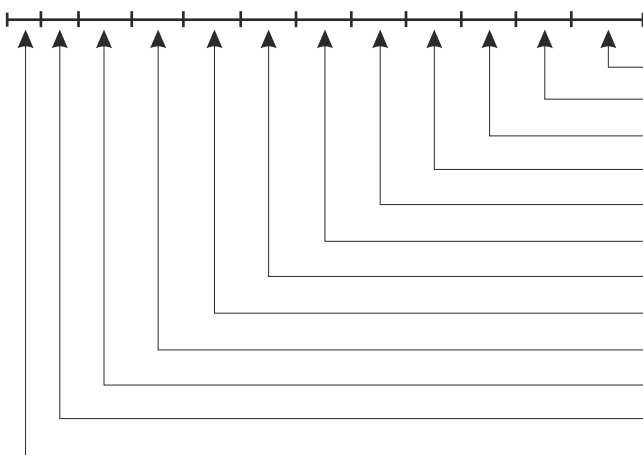

See: Command 039

See our protocol.

Transmitting codeset 706 (IR codes) from a computer.

0100039706<1><2><3><4><5><6><7>CHK

- CHK = Checksum (3-digits)
- <7> = Parameter 7 (Repeat)
- <6> = Parameter 6 (3-digits, number of bits)
- <5> = Parameter 5 (3-digits, variant)
- <4> = Parameter 4 (3-digits)
- <3> = Parameter 3 (3-digits)
- <2> = Parameter 2 (3-digits)
- <1> = Parameter 1 (3-digits)
- 706 = CodeSet (706 = RC6)
- 039 = Command 039 (DoAction)
- 00 = FromAddress, 00 = computer
- 01 = ToAddress, 01 = products address

Receiving codeset 706 by RS232

000170600600000000003202000091

- Red = ToAddress (00) and FromAddress (01)
- Blue = codeset 706 detected code
- Black = CheckSum
